

## How to insert a YouTube Video into Smart Notebook.

First find the video you want on YouTube

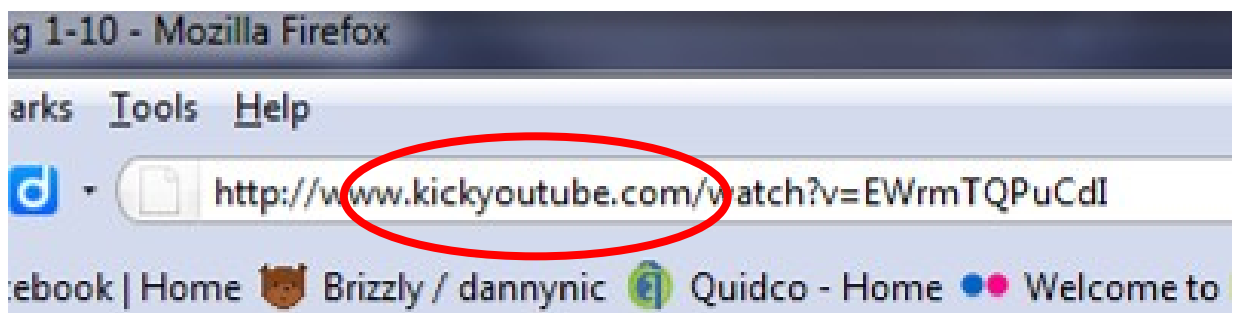

Here is the original link as it looks on You Tube

<http://www.youtube.com/watch?v=EWrmTQPuCdI>

All you need to do is to alter the URL of the YouTube Page by adding the word “kick” in front of the youtube.com to give this address:

<http://www.kickyoutube.com/watch?v=EWrmTQPuCdI>

This site allows you to download YouTube files in different formats. You can see the formats available above the video in a long black bar.

To Embed into Smart Notebook – choose FLV. To have as a standalone video file choose MP4. If all you want is the audio as a sound file, then choose MP3

Click on the **FLV** button, and then click on the green **Go** button.

The Go button will change to a blue **Down** button.

Right click on the Down button and select Save Target As (or Save Link As in Firefox)

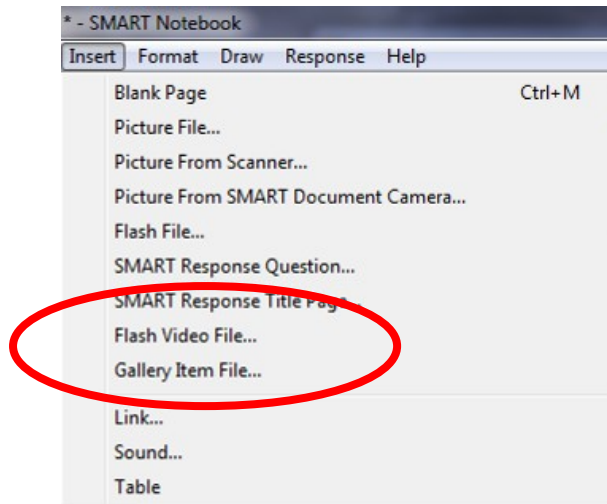

You can then save this FLV file to wherever you want to on your computer.

## To Insert this video into Smart Notebook 10

First open Smart Notebook.

From the Insert Menu – choose Flash Video

Browse to the FLV video you downloaded earlier

Select the file and click Open

The video will then be placed on the Smart Notebook page as a regular object.
